EDUCATION

2021 - 2025

Fırat University

Software Engineer

EXPERIENCE

AGARTHA TEKNOLOJİ A.Ş.
2024

July- September

During my internship, I developed web applications using C# and MVC. I managed database operations with Entity Framework and ensured application modularity with layered architecture.

NETAS

2024

October-

I am developing a project using Node.js and Angular technologies. I am using MSSQL as the database. I focus on making improvements, enhancements, and additions to the project to make the system more functional and user-friendly.

ABOUT ME

I am a fourth-year software engineering student with a big interest in learning and trying new ideas. In my projects, I focus on research, solving problems, and thinking creatively.

I am especially interested in .NET backend development. I have worked with layered architectures, used dependency injection, and integrated Entity Framework. I want to learn more and improve my skills by exploring new technologies.

LANGUAGE

English (intermediate)

PROJECTS

Blood Bank Automation November 2022 - January 2023

In my blood bank automation project, built with C# and Microsoft SQL, employees can see events such as the names of donors and recipients, blood types, the amount of each blood type remaining in storage, and transfer transactions within the system.

Water Pressure Sensor | Arduino Uno November 2023 - December 2023

This project, built with C++, is a simple water control system that automates water management by monitoring the water level and taking action based on predetermined threshold values.

Website for Celiac Patients | ÇöİAyak October 2023 - December 2023

Our website, built with Node, JavaScript, HTML, Firebase, and CSS, is a practical platform for those with gluten sensitivity. It showcases gluten-free products and their prices in various stores, and allows users to explore brands offering gluten-free options.

Cultural Sites Website | GOON May 2024 - Jun 2024

On my website, built with ASP.NET and Firebase, you can find historical and cultural sites to visit in various cities in Turkey. Users can log in to leave comments and view places to visit in different cities.

Local Recipes and Shopping List App in Turkey | GurmeRota March 2024 - May 2024

Gurme Rota is a mobile app featuring unique recipes from Turkey's 81 provinces. Built with React Native and Firebase, it lets users explore Turkish cuisine, save favorite dishes, and create shopping lists for ingredients.

SKILLS

-JavaScript
-HTML - CSS
-C#
-SQL Server Management Studio
-Firebase
